WHAT IS GEMEON?

GROUP OF EXPERTS IN ONCOLOGICAL AESTHETIC MEDICINE

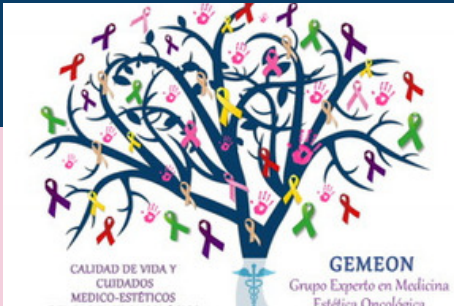

We are a consortium of healthcare professionals collaborating with diverse groups focusing mainly on oncological patients. These types of patients need care that exceeds the normal realms of oncology. Our aim is to improve the quality of life of our patients throughout the oncological process, this means during the process as well as when making full recovery and returning to a normal lifestyle having fully recovered functionally and their body image.

The concept of “health” according to the WHO is a Health is a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity. New York, 19 June - 22 July 1946. The ultimate goal of medicine is health. Occasionally this can be achieved via a cure and in other instances via soothing, but what is always necessary is preventing, easing and accompanying the patient.

WHAT IS GEMEON?

GROUP OF EXPERTS IN ONCOLOGICAL AESTHETIC MEDICINE

Aesthetic Medicine plays a key role achieving this healthy state, prior, during and after the oncological process. Cancer treatments exert a very negative impact on the emotional sphere altering significantly the patient's quality of life that promoting the therapeutic values of body image becomes crucial to them.

GEMEON was born after the first class of the Masters' degree in "Quality of Life and Medical Aesthetic Care of the Oncological Patient". We strive to become the link between all related oncologic specialties that collaborate in the prevention, treatment and recovery of cancer patients.

OBJECTIVES

1. ADVISING

Our group advises doctors and promotes all aspects of aesthetic treatments to improve the quality of life of patients that have cancer or are cancer survivors.

We provide individuals that encounter oncological patients, be it health promoters, physician assistants, nurses, physiotherapists...etc. as well as non-healthcare staff, specific academic training and counselling in the field of aesthetics.
